Position Title: Design & Technology teacher

Contract Type: Part-time (14h/20h - 20h/week is a FTE at CFBL)
Start Date: asap
Age Group: Secondary (Y8 & Y9)

About the CFBL

Housed in a listed Victorian building in the heart of London, CFBL is an Ofsted Outstanding-rated institution hosting 700 students from Nursery to Year 10. With over 60 nationalities represented, CFBL emphasises languages, multicultural learning, and the development of global citizens. Our bilingual teaching, based on an enhanced French curriculum, fosters academic excellence and personal growth, preparing students for various educational pathways including the French baccalaureate, IB, or A Levels.
Our diverse team enriches the learning experience, promoting openness, tolerance, and creativity both inside and outside the classroom. We believe in nurturing confident, globally-minded individuals through projects, trips, and collaborative endeavours.

The Role

As a Design & Technology teacher, you will:

- Teach a class of secondary pupils in English
- Deliver instruction supporting diverse learner profiles in alignment with the French National curriculum and our English supplementary program
- Collaborate closely with your colleagues to ensure a comprehensive learning experience
- Assess pupils and complete academic assessment materials
- Participate in institutional, pedagogical, and pupils' follow-up meetings ● Establish regular communication with parents, colleagues, and management ● Work collaboratively with other teachers, English coordinators, and management on school projects
- Participate in school events and activities

Responsibilities and person specifications:

- Curriculum delivery: Plan and deliver engaging, practical and investigative lessons aligned with the French National Curriculum for Technology Subject knowledge

- Develop pupils' understanding of technological systems, engineering design, programming, automation, modelling, digital technologies and sustainable development.
- Practical and project-based learning: Use hands-on activities, experimentation and design challenges to develop pupils' creativity, technical reasoning, problem-solving and computational thinking.
- Bilingual learning: Support pupils in developing their understanding of technical concepts and key terminology in English and French, within the school's bilingual educational framework.
- Curriculum planning and progression: Work with colleagues to implement and develop coherent schemes of work aligned with the revised French Technologie curriculum ● Assessment and feedback: Assess pupils' knowledge, practical skills and technical understanding, providing constructive feedback and completing assessment and reporting requirements in accordance with school procedures.
- Interdisciplinary collaboration: Collaborate with colleagues across STEAM to support meaningful cross-curricular learning opportunities where appropriate.
- Inclusive teaching: Adapt teaching approaches and resources to meet the needs of pupils with different abilities, language backgrounds and additional learning needs. ● Health and safety: Promote safe and responsible use of practical equipment, materials and digital technologies.
- Professional responsibilities: Maintain effective communication with parents and colleagues, contribute to relevant meetings, pupil progress discussions and wider school activities as appropriate.

Salary and Benefits

We offer a generous compensation and benefits package, including:

- Salary range
- 16 weeks' holiday aligned with school holidays
- School fee discount
- Enhanced pension contribution up to 10 % employer contribution]
- Enhanced parental leave
- Flexible benefits allowance
- Perkbox scheme
- Bike-to-work scheme
- Life & Income protection

- Perkbox subscription
- Professional learning opportunities including French/English lessons

Conditions

Safeguarding and Welfare: The School is committed to safeguarding and promoting the welfare of children. Applicants must be willing to undergo appropriate child protection screening. Right to Work in the UK: EEA nationals must have immigration permission to work in the UK.
